

Web Site 5th draft revisions

Homepage

- Loading screen: leave the logo on hold for now so we can do something like this this later: 
Camron
Change the background to white and the text to black.
- Video should already be a little visible so ppl are intrigued
- I would adjust on the homepage is making the “Book Your Band” button in the “Choose Your Band” section stay fixed in the same position while scrolling.
- Brands can be a little bigger. We need the band movement to stay constant and not slow down when you hover the cursor over it. Or at least only change the speed if you click and drag the cursor to one side to accelerate the movement. It shouldn’t slow down just by hovering over it.
- Brands that we should correct the png
1 Delete this in the first line (i can’t figure out what brand is it)
2 replace this png in the second line  Google Drive 2nd line - [Google Drive](#)
- “choose you band” section: Should be as fluid as the reference: <https://weave.figma.com/?ref=siteinspire> Right now it feels a bit too slow, and you have to scroll too many times to get to the bottom
- WORLDWIDE SECTION:
We think the locations should be pinned to the globe’s movement. The cursor should make the globe move as if you were grabbing it, rather than the globe moving on its own.

Could we duplicate the existing locations until we have at least 10, and then later replace the photos and names? That way we can see the map closer to the final version.

Also, please make sure that when a photo appears behind another one, it doesn’t get hidden by a different location marker. In this case, the photo should appear on top.
- Gallery: smaller, with arrows, and dynamic (change every 20seconds). We want it like the gallery here: <https://brotherockers.com/en-gb/weddings-new/>
Also, round the corners of the pictures more.
- Form:
White background and same format as this one: <https://brotherockers.com/en-gb/weddings-new/> but smaller and with our new typo, of course

We can keep the block appearing above the gallery, but Pierre decided he doesn’t like the text presented that way. It’s better to keep it large but without animation.

Navigation Bar

- We are going to change ‘OTHER MUSICAL SERVICES’ for ‘MORE MUSIC ACTS’

Band’s pages

- Mock up here:  [Protected Website](#)
- Put logo in this bands (Brotherockers, why so serious, supersonics, blackjacks, cafe creme), the rest of them leave without logo for now until we refresh all the visuals.
Logos here:  Google Drive 2 - [Branding](#) - [Google Drive](#)
- Instagram: do the same as here  Pierre Geslain [The Kingsmen Eng](#)
